

Providing Ultrasound Solutions for Wide Bay

At WBUDS, we believe that everyone should have access to quality medical imaging, regardless of their location or circumstances.

We are committed to delivering ultrasound solutions that support the health of the Wide Bay community — including those who may not be able to attend traditional radiology clinics. Our mobile and flexible service model is designed to improve access, reduce wait times, and make diagnostic care more convenient for patients across the region.

Who We Are

Wide Bay Ultrasound Diagnostic Services (WBUDS) is a locally owned medical imaging provider established as an extension of our Urodynamics services.

Our mission is to enhance access to high-quality ultrasound diagnostics across the Wide Bay region — addressing the ongoing shortage of local imaging services and supporting the health needs of our community.

Why Choose Us

Expertise that you can trust

With over 10 years of experience in the medical imaging field, our founder ensures that all ultrasounds are performed by a qualified, **Accredited Medical Sonographer**, giving patients confidence and peace of mind about their care.

Mobile Outreach Services

We understand the challenges of access in regional areas.

Mobile Ultrasound Services are available for patients at **home, in nursing homes, and in clinics** — bringing high-quality diagnostic imaging directly to your location when needed.
